Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on 7/5/2005 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the examiner has considered the information disclosure statement.

Drawings

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: In Figure 1, twisted pair line 18 (disclosed on page 6, lines 4-26 of the specification) is not labeled.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the examiner does not accept the changes, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

3. Claims 1-4, 6, 7, 9, 11, 12, 15, 17-20, and 23-27 (renumbered 1-19, respectively) are allowed.

4. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, *El-Batal et al.* (U.S. 6,625,144) teaches a DB-9 connector for RS-232 communications having a DCD line and an RTS line used for controlling access of a serial channel.

El-Batal et al. as well as the other prior art of record do not teach the assertion of the RTS line after a period of time from detecting the de-assertion of the DCD line, where the period of time comprises a propagation delay for signals transmitted on the twisted pair line and a random period of time after the propagation delay.

Regarding claims 2-4 and 9, these claims are further limiting to claim 1 and are thus also allowable over the prior art of record.

Regarding claims 6, 7, 15, 19, 23, and 27, *El-Batal et al.* (U.S. 6,625,144) teaches a DB-9 connector for RS-232 communications having a DCD line and an RTS line used for controlling access of a serial channel.

El-Batal et al. as well as the other prior art of record do not teach the assertion of the RTS line after a period of time from detecting the de-assertion of the DCD line.

Regarding claims 11 and 24, *El-Batal et al.* (U.S. 6,625,144) teaches a DB-9 connector for RS-232 communications having a DCD line and an RTS line used for controlling access of a serial channel.

El-Batal et al. as well as the other prior art of record do not teach the assertion of the RTS line after a period of time from detecting the de-assertion of the DCD line, where the period of time comprises a propagation delay for signals transmitted on the twisted pair line.

Regarding claims **12, 17, and 18**, these claims are further limiting to claim **11** and are thus also allowable over the prior art of record.

Regarding claim **20**, this claim is further limiting to claim **19** and is thus also allowable over the prior art of record.

Regarding claims **25 and 26**, these claims are further limiting to claim **24** and are thus also allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ross (U.S. 6,400,725) and Shideler et al. (U.S. 6,625,163) are additional references considered pertinent to this application.
